# READING

Time: 20 minutes. Maximum points – 15

Task 1. Read the text and choose for questions 1-8 the answer (A, B, C or D) which you think fits best according to the text. Write the appropriate letters A-D in boxes 1—8 on your answer sheet.

As viewed from space, the Earth's distinguishing characteristics are its blue waters and white clouds. Enveloped by an ocean of air consisting of 78% nitrogen and 21% oxygen, the planet is the only one in our

solar system known to harbor life. Circling the Sun at an average distance of 149 million km (93 million miles), the Earth is the third planet from the Sun and the fifth largest planet in the solar system.

Its rapid spin and molten nickel-iron core give rise to an extensive magnetic field which, coupled with the atmosphere, shields us from nearly all of the harmful radiation coming from the Sun and other stars. Most meteors burn up in the Earth's atmosphere before they can strike the surface. The planet's active geological processes have left no evidence of the ancient pelting it almost certainly received soon after it was formed.

The Earth has a single natural satellite—the Moon.

1. *Approximately how much of the Earth's atmosphere is nitrogen?*

8. Bad for animals E 16

A) The mountains of Scotland (we call them the Highlands) are a wild and beautiful part of Europe. A golden eagle flies over the mountains. A deer walks through the silence of the forest. Salmon and trout swim in the clean, pure water of the rivers. Some say that not only fish swim in the deep water of Loch Ness. Speak to the people living by the Loch. Each person has a story of the monster, and some have photographs.

B) Tresco is a beautiful island with no cars, crowds or noise – just flowers, birds, long sandy beaches and the Tresco Abbey Garden. John and Wendy Pyatt welcome you to the Island Hotel, famous for delicious food, comfort and brilliant service. You will appreciate superb accommodation, free saunas and the indoor swimming pool.

C) The Camel and Wildlife Safari is a unique mixture of the traditional and modern. Kenya's countryside suits the Safari purposes exceptionally well. Tourists will have a chance to explore the bush country near Samburu, to travel on a camel back or to sleep out under the stars. Modern safari vehicles are always available for those who prefer comfort.

D) Arrival can be the hardest part of a trip. It is late, you are road-weary, and everything is new and strange. You need an affordable place to sleep, something to eat and drink, and probably a way to get around. But in general, it's a wonderful trip, full of wonderful and unusual places. Whether it is the first stop on a trip or the fifth city visited, every traveler feels a little overwhelmed stepping onto a new street in a new city.

E) No zoo has enough money to provide basic habitats or environments for all the species they keep. Most

animals are put in a totally artificial environment, isolated from everything they would meet in their natural habitat. Many will agree that this isolation is harmful to the most of zoo inhabitants, it can even amount to cruelty.

F) A new London Zoo Project is a ten year project to secure the future for the Zoo and for many endangered animals. The plan has been devised by both animal and business experts to provide world-leading accommodation for all our animals, to engage and inform people more fully about conservation issues, to redesign certain aspects of Zoo layout.

G) Leave-no-trace camping is an increasingly popular approach to travel in wilderness areas. As the term suggests, the goal is for the camper to leave as little impact as possible on the place he is visiting. One of its mottos is "Take nothing but pictures. Leave nothing but footprints." Its simplest and most fundamental rule is: pack it in, pack it out, but it goes beyond that.

Samuel Swiss Intermediate 17.12.04

Krasnoyarsk is a big Russian industrial city. It has many objects to make energy for all region. But it is dirty city.

In Krasnoyarsk live one million people. The town has two zones: right and left beaches of the river Enisei. Between the beaches there is a river Enisei. It is cold big and fast river, and our city has 4 bridges. Roads in the city are very small. There isn't warm all year, however it is a Siberia. The sky is always grey, but it isn't because of rain or snow, there is pollution. Krasnoyarsk has many interesting places to visit: Tatishchev Island, "Sokolki", taiga and forests. The town is old, it was built in Russian Empire.

There 20+ years can't build metro. It is bad. Novosibirsk, the city without million people, has the metro, and Krasnoyarsk has not. It is injustice! I don't like it. Also there no gas in all houses, and we take energy from coal. Leninsky district is the most dangerous place in the city (in the Earth!), and it has many very old houses.

This town isn't for happy people, there is all for sad. It is not city of dream, but I live here.

*Task 1. Read the text and choose for questions 1-8 the answer (A, B, C or D) which you think fits best according to the text. Write the appropriate letters A-D in boxes 1—8 on your answer sheet.*

As viewed from space, the Earth's distinguishing characteristics are its blue waters and white clouds. Enveloped by an ocean of air consisting of 78% nitrogen and 21% oxygen, the planet is the only one in our

solar system known to harbor life. Circling the Sun at an average distance of 149 million km (93 million miles), the Earth is the third planet from the Sun and the fifth largest planet in the solar system.

Its rapid spin and molten nickel-iron core give rise to an extensive magnetic field which, coupled with the atmosphere, shields us from nearly all of the harmful radiation coming from the Sun and other stars. Most meteors burn up in the Earth's atmosphere before they can strike the surface. The planet's active geological processes have left no evidence of the ancient pelting it almost certainly received soon after it was formed.

**Task 2. Read the texts. Match the headings (1-8) with the texts (A-G). There is one extra heading.**

1. New rules to follow

5. A visit to the zoo

2. New perspectives

6. Perfect for an active holiday

3. Perfect for a quiet holiday

7. Difficult start

4. Land of nature wonders

8. Bad for animals

A) The mountains of Scotland (we call them the Highlands) are a wild and beautiful part of Europe. A golden eagle flies over the mountains. A deer walks through the silence of the forest. Salmon and trout swim in the clean, pure water of the rivers. Some say that not only fish swim in the deep water of Loch Ness. Speak to the people living by the Loch. Each person has a story of the monster, and some have photographs.

B) Tresco is a beautiful island with no cars, crowds or noise – just flowers, birds, long sandy beaches and the Tresco Abbey Garden. John and Wendy Pyatt welcome you to the Island Hotel, famous for delicious food, comfort and brilliant service. You will appreciate superb accommodation, free saunas and the indoor swimming pool.

C) The Camel and Wildlife Safari is a unique mixture of the traditional and modern. Kenya's countryside suits the Safari purposes exceptionally well. Tourists will have a chance to explore the bush country near Samburu, to travel on a camel back or to sleep out under the stars. Modern safari vehicles are always available for those who prefer comfort.

D) Arrival can be the hardest part of a trip. It is late, you are road-weary, and everything is new and strange. You need an affordable place to sleep, something to eat and drink, and probably a way to get around. But in general, it's a wonderful trip, full of wonderful and unusual places. Whether it is the first stop on a trip or the fifth city visited, every traveler feels a little overwhelmed stepping onto a new street in a new city.

E) No zoo has enough money to provide basic habitats or environments for all the species they keep. Most

animals are put in a totally artificial environment, isolated from everything they would meet in their natural habitat. Many will agree that this isolation is harmful to the most of zoo inhabitants, it can even amount to cruelty.

F) A new London Zoo Project is a ten year project to secure the future for the Zoo and for many endangered animals. The plan has been devised by both animal and business experts to provide world-leading accommodation for all our animals, to engage and inform people more fully about conservation issues, to redesign certain aspects of Zoo layout.

G) Leave-no-trace camping is an increasingly popular approach to travel in wilderness areas. As the term suggests, the goal is for the camper to leave as little impact as possible on the place he is visiting. One of its mottos is "Take nothing but pictures. Leave nothing but footprints." Its simplest and most fundamental rule is: pack it in, pack it out, but it goes beyond that.

Salmon and trout swim in the clean, pure water of the rivers. Some say that not only fish swim in the deep water of Loch Ness. Speak to the people living by the Loch. Each person has a story of the monster, and some have photographs.

3 B) Tresco is a beautiful island with no cars, crowds or noise – just flowers, birds, long sandy beaches and the Tresco Abbey Garden. John and Wendy Pyatt welcome you to the Island Hotel, famous for delicious food, comfort and brilliant service. You will appreciate superb accommodation, free saunas and the indoor swimming pool.

6 C) The Camel and Wildlife Safari is a unique mixture of the traditional and modern. Kenya's countryside suits the Safari purposes exceptionally well. Tourists will have a chance to explore the bush country near Samburu, to travel on a camel back or to sleep out under the stars. Modern safari vehicles are always available for those who prefer comfort.

2 D) Arrival can be the hardest part of a trip. It is late, you are road-weary, and everything is new and strange. You need an affordable place to sleep, something to eat and drink, and probably a way to get around. But in general, it's a wonderful trip, full of wonderful and unusual places. Whether it is the first stop on a trip or the fifth city visited, every traveler feels a little overwhelmed stepping onto a new street in a new city.

8 E) No zoo has enough money to provide basic habitats or environments for all the species they keep. Most

animals are put in a totally artificial environment, isolated from everything they would meet in their natural habitat. Many will agree that this isolation is harmful to the most of zoo inhabitants, it can even amount to cruelty.

**A** F) A new London Zoo Project is a ten year project to secure the future for the Zoo and for many endangered animals. The plan has been devised by both animal and business experts to provide world-leading accommodation for all our animals, to engage and inform people more fully about conservation issues, to redesign certain aspects of Zoo layout.

**1** G) Leave-no-trace camping is an increasingly popular approach to travel in wilderness areas. As the term suggests, the goal is for the camper to leave as little impact as possible on the place he is visiting. One of its mottos is "Take nothing but pictures. Leave nothing but footprints." Its simplest and most fundamental rule is: pack it in, pack it out, but it goes beyond that.

**Here are some things that you could provide information about.**

- population
- political structure
- climate
- industries
- land use (farms, forests, etc.)
- things that the area is famous for
- animals and plants that visitors might see
- some interesting places that they could visit

Write 200–250 words.

This is my lovely native town - Krasnoyarsk. I want to tell something about this place. Population of Krasnoyarsk contains about 1,000,000 people, so it is really crowded and noisy place. But we don't have underground even Krasnoyarsk is one of the biggest cities in Russia. If you know Krasnoyarsk is capital of Siberia, it means, the weather is really cold and stranger than in other cities. For example, in summer we can't breathe normally because is too hot and muggy there, then in winter we have to wear a lot of strange clothes.

# READING

Time: 20 minutes. Maximum points – 15

Task 1. Read the text and choose for questions 1-8 the answer (A, B, C or D) which you think fits best according to the text. Write the appropriate letters A-D in boxes 1—8 on your answer sheet.

As viewed from space, the Earth's distinguishing characteristics are its blue waters and white clouds. Enveloped by an ocean of air consisting of 78% nitrogen and 21% oxygen, the planet is the only one in our

solar system known to harbor life. Circling the Sun at an average distance of 149 million km (93 million miles), the Earth is the third planet from the Sun and the fifth largest planet in the solar system.

Its rapid spin and molten nickel-iron core give rise to an extensive magnetic field which, coupled with the atmosphere, shields us from nearly all of the harmful radiation coming from the Sun and other stars. Most meteors burn up in the Earth's atmosphere before they can strike the surface. The planet's active geological processes have left no evidence of the ancient pelting it almost certainly received soon after it was formed.

The Earth has a single natural satellite—the Moon.

1. *Approximately how much of the Earth's atmosphere is nitrogen?*

A One-fourth	B One-half	C Three-fourths ✓	D All of it
--------------	------------	-------------------	-------------

2. *Which of the following helps to create the Earth's magnetic fields?*

A Its blue waters	B Its nitrogen sphere	C Its molten metal core ✓	D The Moon
-------------------	-----------------------	---------------------------	------------

3. *What two factors help to protect the Earth from radiation?*

A Magnetic field and atmosphere ✓	B Rapid spin and molten iron-nickel core	C The Sun and the Moon	D Blue waters and white clouds
-----------------------------------	--	------------------------	--------------------------------

4. *In line 2, "consisting" most nearly means*

A Hardening	B Containing ✓	C Withholding	D Shortening
-------------	----------------	---------------	--------------

5. *Why does the Earth show almost no signs of having been hit by numerous meteors in the past?*

A Humans have built most of the craters.	B Most meteors fell into the ocean and not on land.	C The Earth's magnetic field repelled most meteors.	D The Earth's natural geologic activity has eliminated most traces. ✓
--	---	---	---

6. *The main idea of this passage is that*

A There are life-supporting characteristics on the ✓	B The Earth is predominantly water.	C The Earth has no common characteristics with other planets.	D The Earth is the only planet with a moon.
